

Comes in following versions:

Type W -- Dissolvable temperature above 25 °C

Type M -- Dissolvable temperature above 45 °C

Type H -- Dissolvable temperature above 65 °C

Type S -- Dissolvable temperature above 75 °C

Standard sizes:

- (1) 66 x 84 Centimeters
- (2) 71 x 99 Centimeters
- (3) 91 x 99 Centimeters

Protecting Firefighters Health

Washing bags that dissolve in the wash are the future in the "clean firefighter" project. Smoke, soot and asbestos particles etc. on clothes and equipment may be harmful for up to 24 hours after a fire. It creates one extremely dangerous working environment, not just for the individual, but for all others it had to come into contact with that.

With ANTAC soluble wash bags, all clothing after use can be added immediately in a laundry bag and shipped to dry cleaning making further dealing with the harmful particles unnecessary. ANTAC wash bags are compostable and Biodegradable:

Simply put the bag into the washingmachine and it will dissolve during wash

Tested for ASTM6400D and EN13432

Used by Danish Fire Departments
